PROFESSIONAL SUMMARY

AI Full Stack Developer with 3+ years of experience building production web and mobile applications on React.js, React Native, Node.js and MongoDB for 10,000+ users. Creator of Vaktora, an AI interview preparation app published on Google Play, and a MongoDB Certified Developer. Specializes in event-driven backends, LLM evaluation pipelines and release automation that measurably improve latency, throughput and delivery speed.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java, Python, C++

Frontend & Mobile: React.js, Next.js, React Native, Expo, Tailwind CSS, HTML5, CSS3

Backend & APIs: Node.js, Express.js, Spring Boot 3 (Java 17), FastAPI, RESTful APIs, WebSockets (Socket.IO), JWT Authentication, Role-Based Access Control (RBAC)

Databases & Caching: MongoDB, PostgreSQL, MySQL, Redis, BullMQ, Schema Design, Indexing, Query Optimization

AI Engineering: OpenAI API, Claude API, Whisper, Local LLMs (Kimi), Prompt Engineering, LLM Evaluation Pipelines, Model Fallback Routing

Architecture & DevOps: Distributed Systems, Event-Driven Architecture, Microservices, Multi-Tenancy, Docker, CI/CD Pipelines, Google Cloud Run, AWS, Azure, Nginx, Linux, Git, Jest, Agile

PROFESSIONAL EXPERIENCE

Full Stack Developer | Aditya University

March 2023 – Present

- Engineered full-stack web and mobile applications on Node.js, React.js, React Native and MongoDB, sustaining **99.9% uptime** across production environments.
- Reduced system response latency by 40%** by architecting event-driven backends with Redis and BullMQ for asynchronous job processing.
- Delivered live interview sessions, push notifications and multi-user workflows over Socket.IO, supporting 500+ concurrent connections.
- Improved API response times by 35%** with Redis caching layers and lowered MongoDB query execution time by 25% through schema refactoring and compound indexes.
- Secured 3 user roles (Admin, Staff, Student) with JWT authentication and role-based access control (RBAC).
- Containerized applications with Docker and configured CI/CD pipelines, enabling zero-downtime deployments across 3+ production services.
- Shipped 15+ major releases on schedule in an Agile team and coached 5 junior developers through code reviews and pair programming, shortening PR review cycles by 30%.

PROJECTS

Vaktora – AI Interview Preparation Platform | Kaziva | Live on Google Play

2026

React Native, Node.js, Socket.IO, MongoDB, Redis, BullMQ, OpenAI API, Whisper, Kimi (local LLM), Docker, CI/CD | vaktora.app

- Launched the complete product independently: React Native app, Node.js services, session layer, AI scoring engine and Play Store release.
- Architected a WebSocket backend supporting **200+ concurrent interview sessions with sub-100ms event delivery** and 5,000+ events per session.
- Built a dual-path LLM evaluation pipeline using local Kimi and Whisper models with automatic OpenAI fallback, returning a grade, actionable feedback and scores across 5 skill dimensions for every spoken answer.
- Accelerated scoring turnaround with asynchronous, retryable job queues and **brought deployment time from 45 minutes to under 10** across 4 Docker microservices.

LSRW Communication Assessment Platform | Adopted by 3+ educational institutions

Next.js, Node.js, MongoDB, OpenAI API

- Created a modular AI-driven assessment system for Listening, Speaking, Reading and Writing proficiency with 20+ interactive testing modules.
- Automated grading of spoken and written responses with OpenAI, **saving 60% of educator marking time** while retaining hybrid human review for subjective tasks.
- Orchestrated test scheduling and analytics jobs processing 1,000+ assessments per session with instant reporting for educators.

Village Finance – Multi-Tenant Lending & Collections Platform | In testing on Google Cloud **2026**

React Native (Expo), TypeScript, Java 17, Spring Boot 3, Spring Security, PostgreSQL (Neon), Cloudflare R2, Docker, Google Cloud Run, React.js, Jest

- Developed 3 applications end to end: an Expo mobile app for owners and field collectors, a Spring Boot REST API on Cloud Run and a React.js console for tenant onboarding.
- Enforced **tenant isolation from the signed JWT alone** across 20+ PostgreSQL tables scoped per tenant, so no request can reach another client's data.
- Implemented 4 core financial workflows (loans, installments, weekly book closing, chit funds), device-bound collector logins with audit trails, and presigned Cloudflare R2 uploads optimized for low-bandwidth mobile networks.
- Authored 460+ Jest tests across the mobile app and admin console.

EDUCATION

Bachelor of Technology (B.Tech), Electronics and Communication Engineering **2019 – 2023**

Aditya Engineering College

CERTIFICATIONS

MongoDB Certified Developer Associate | MongoDB, Inc. | Credly verification **2025**

ACHIEVEMENTS

- Trained 700+ students in full-stack development (MERN stack, React Native); 85%+ completed capstone projects and secured developer roles.
- Led development of 6 production-grade applications, all delivered on time with zero critical post-launch defects.
